## Nuclear Medicine Textbook: Methodology and Clinical Applications

Duccio Volterrani, MD, Paola A. Erba, MD, PhD, Ignasi Carriò, MD, H. William Strauss, MD, Giuliano Mariani, MD

**February 2019 • 9783319955636 • \$255.95**

Building on the traditional concept of nuclear medicine, this textbook presents cutting-edge concepts of hybrid imaging and discusses the close interactions between nuclear medicine and other clinical specialties, in order to achieve the best possible outcomes for patients. Today the diagnostic applications of nuclear medicine are no longer stand-alone procedures, separate from other diagnostic imaging modalities. Accordingly, today's nuclear medicine specialists are actually specialists in multimodality imaging. This new role requires a new core curriculum for training nuclear medicine specialists. This textbook is designed to meet these new educational needs, and to prepare nuclear physicians and technologists for careers in this exciting specialty.
